

OUTCOME MEASUREMENT AND REPORTING VIRTUAL CONFERENCE

Southern Africa

**Saturday, 4 September &
Sunday 5 September
2021**

09h00 - 16h00

Overview

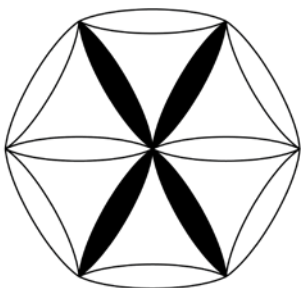

“The most powerful tool in healthcare is measuring results”.

Michael Porter

How good are our health systems in measuring results that matter to patients?

We simply cannot improve if we don't measure what matters most and act on the results.

Two years ago, the Competition Commission's Health Market Inquiry (HMI) released its “Final Findings and Recommendations Report”.

Coordinate
Nexus
Event Management Specialist

Key findings in the Health Market Inquiry report include:

- The absence of appropriate information on the quality of health services in both the public and private sector.
- That collated healthcare data is neither standardised, nor risk adjusted, nor scientifically verified.
- That the absence of outcomes data is a constraint on moving towards value-based purchasing and is essential to the NHI Fund.
- The need for the creation of an Outcome Measurement and Reporting system that is provider driven and independent from economic and political interference.

Have our health systems made progress to address these findings?

The 2021 Outcome Measuring and Reporting (OMR) Conference SA aims to bring together a wide array of practitioners passionate about improving healthcare and outcomes, stakeholders committed to value-based healthcare (VBHC), and an expert panel with the sole purpose of fostering dialogue on how we can improve OMR.

This dialogue needs to touch on key questions that include:

- Why is outcomes measurement important?
- What is the state of outcomes measurement in South Africa?
- What can we do to improve outcomes measurement?
- How should we align with international outcomes measurement initiatives?

We encourage those passionate about outcomes and value-based care to join the discussion with our experts.

Who should Attend

- Healthcare professionals with an interest in improving health outcomes and a focus on quality.
- Healthcare funders with an interest in improving outcomes, adopting outcome funding models and value-based healthcare.
- Hospital and clinic managers who can influence outcome measurement and quality.
- Healthcare policy makers.
- Bioscience companies committed to improving clinical outcomes.

Benefits of Attending

- Gain crucial insights into the status of outcomes reporting and the future of outcomes measurement and reporting in South Africa.
- Appreciate the shift to and need for value-based care.
- Improved understanding of strategies you, your organisation and your society can adopt to be part of the journey to outcomes.
- Interacting and networking with professionals who share your passion for patient care.

SPEAKERS

Prof Alex van den Heever

Chair: Social Security Systems Administration and Management Studies, WITS School of Governance

Dr Ntuthuko Bhengu

HMI Panelist; Founder: Alchemy Health Technologies; Medical Practitioner

Dr Neil Soderlund

CEO: Quantum Health Australia, Past CEO Health Outcomes Australia

Prof Sharon Fonn

HMI Panelist; Professor: School of Public Health, WITS; Acting Dean of the Faculty of Health Sciences WITS

Dr Flavia Senkubuge

President: The Colleges of Medicine of South Africa (CMSA); Acting Chair: UP's School of Health Systems and Public Health

Prof Björn Eliasson

Professor of Internal Medicine; Past President of Swedish Society of Diabetology

Wilma Erasmus

Chair: International Private Physical Therapy Association (IPPTA); Physiotherapist in Private Practice

Dr Sham Moodley

Vice Chair: ICPA; Chair: Pharmacy First Forum; Community Pharmacist

Dr Pax Ramela

Chair: Optimal Managed Care; MD: PPN; Previous CEO: SAOA

Carol Garner

Chair: Case Manager Association of South Africa (CMASA); MD: Global Case Management Solutions

Dr Vuyo Gqola

GEMS: Chief Healthcare Officer

Dr Rajesh Patel

Specialist Family Physician; Head: Benefit & Risk Dept; BHF

Prof Andrew Boule

Professor of Public Health and Family Medicine UCT, Lead Western Cape Health Data Centre

Prof Solomon Rataemane

Chair MDB of HPCSA; Chief Psychiatrist Dr George Mukhari Hospital; Former University Dept. Head; Past President African Association of Psychiatrists

Dr Olurotimi Modupe

Medical Practitioner; Senior Manager Clinical Unit: CMS; Project Lead PMB Review and Primary Care Package; Past Manager Barberton Public Hospital

Madelein Bester

Pharmacist; Medicine Funding Expert; Executive: Funding Strategy, Mediscor

Dr Naomi Folb

Medical Practitioner; Advanced Specialist in Clinical Governance, Quality and Clinical Outcomes; Health Policy Unit: Medscheme

Rosalind Reddy

Clinical Executive: Medshield; Professional Nurse; Member of IODSA

Dr Lee Moses

Medical Practitioner; Lead - Provider Contracting: Medihelp Medical Scheme

Amanda Secombe

Founder The Eyes2Eyes Cornea Foundation; Strategic Corporate Marketing Expert; Eye Patient and Community Eye Health Student

Dr Siphwe Mndaweni

Medical Practitioner; CEO: OHSC; Past Deputy DG: District Health Services KZN

Samantha Dunbar

Physiotherapist; Director SAPPF; Exco Member IPPTA; Past Chair SASP PhysioFocus Committee

Dr Andrew Good

Chair: Clinical Governance Committee; Outcomes and Healthcare Improvement Consultant; MD Prognosis

TOPICS

Day 1 - Outcome Measurement and Reporting (OMR) - Why does it matter?

- A critical review of the state of the South African health systems. How can quality measurement and outcomes be used to improve South African health care systems both private and public?
- Is South African healthcare patient focussed? A patient perspective/ insight into the challenges faced in accessing eye care in South Africa. How can we learn from this experience to deliver patient-centric care?
- Health outcome reporting - Findings from HMI and recommendations from HMI.
- Outcome's measurement - International trends and learning.
- The Swedish National Diabetes Register - Celebrating 25 years; lessons learnt, value created and registry project recommendations.
- Roadmap for improved OMR in public sector health services based on individuated health data.
- Co-ordination of care, a key component of value based care - the GEMS experience.
- OMR the perspective from the Council for Medical Scheme (CMS) - How should OMR inform scheme funding, benefit design and the funding of PMB's?
- OMR the HPCSA perspective - Ethical considerations for OMR initiatives
- OMR the perspective from the Office of Health Standards and Compliance (OHSC) - Why is OMR important for health standards?
- How should we be measuring the performance of healthcare funders?

Speakers & Topics are subject to change.

Programme CPD Accredited

Day 2 - Outcome Measurement and Reporting (OMR) - Considerations to improve OMR.

- The role and place of the public sector in outcomes monitoring.
- Outcome measurement in chronic disease - How is outcome measurement being used to improve chronic disease management? How can this be improved?
- Towards value-based reimbursement: a funder's perspective.
- How might the CMSA contribute to specialist practitioners using OMR to improve outcomes.
- OMR and family practice - How should family practice be using OMR to improve outcomes, inform referral, co-ordinate care and improve quality.
- Clinical quality and outcomes measurement, the pharmacist perspective - Should Pharmacists be involved in outcome measurement and improving clinical quality? What role should they play?
- OMR, the physio perspective - Patient reported outcome measures (PROMs) - International trends in the use of PROMs by Physiotherapy in the management of musculoskeletal disease and its relevance in Southern Africa.
- OMR, the optometrist perspective - How should optometrists be involved in OMR and improving value- based eye care?
- OMR, the nursing and clinical nurse practitioner perspective - How should nurses be involved in OMR and improving clinical quality?
- OMR, the case manager perspective - How should OMR inform case management and case management processes?
- OMR, how should it inform scheme funding and managed care - Views on OMR use in informing funding decisions, managed care processes and provider arrangements.
